## Developer & Investor – Photovoltaic power plants

### COMPANY

Tryba Energy was founded in 2008 by Johannes Tryba, sole shareholder of the Atrya Group, which is an European leader in home solutions like windows, doors, verandas, shutters...

Our core business is to develop multi-megawatt photovoltaic power plants in France and abroad. Besides, Tryba Energy can also finance and invest in the plants.

Up to date, Tryba Energy has commissioned about 50MWp of photovoltaic power plants.

### SERVICES

Tryba Energy is specialized in 2 main activities:

- Development: managing the whole chain from the site identification until the fully permitted stage.
- Financing: supporting the development costs, financing the construction and bringing debt with equity for the operation.

Tryba Energy is working closely with qualified partners and is focused on projects quality whilst mastering the key skills in all stages of development.

## INTERNATIONAL PRESENCE

Tryba Energy is focused on three areas: Africa, Middle East and Asia. Our aim is to develop new photovoltaic power plants in other countries. We will achieve this thanks to our track record in France and Romania. The new projects will be realised with local partners.
