European producer of high quality PV panels 20 years product warranty!

COMPANY

Based in Alsace, France, VOLTEC Solar is a manufacturer of very high quality solar panels. The use of best-quality components and an ultramodern production line, where our employees' technical expertise can be put to good use, means that VOLTEC Solar is able to leverage the many advantages of being located in Alsace: manufacturing excellence, competitive pricing and positioned in the heart of Europe.

VOLTEC Solar was founded by a team of shareholders with substantial experience in manufacturing and international sales, which they have used to tackle an ambitious new challenge - to make VOLTEC Solar into a European benchmark for the design and manufacture of solar panels.

The company was created in November 2009, with production already starting on March 1st, 2010 in state-of-the-art facilities and with a dedicated R&D team. With financial backing amounting to tens of millions of Euros, VOLTEC Solar concentrates all their tangible and human resources to a progressive and sustainable development with the goal of multiplication for the years to come.

SERVICES

- French-German manufacturer of PV modules, more than 65% export.
- 20 years product warranty and 25 years output warranty.
- European production certified by TÜV satisfying the Italian Conto Energia and MCS for the UK.
- ISO 9001, ISO 14001 and OHSAS 18001 certified.
- Family owned mid-size company with a strong financial backbone and longterm focus.
- Backed by Munich RE, the world's leading insurance company

PRODUCTS

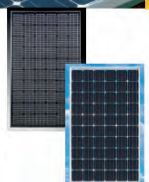

- The components of VOLTEC Solar's modules are recognized for their excellence, their outstanding output and superior quality
- VOLTEC Solar assembles only rigorously qualified mono and poly cells, mostly coming from EU
- Poly modules (60 cells) up to 265Wp, Mono modules (60 cells) up to 280Wp
- Patented roof integration system «NERA»
- VOLTEC Solar's PV modules receive the 10% feed in tariff in France
