NEOEN DEVELOPS, FINANCES, BUILDS AND OPERATES RENEWABLE ENERGY POWER PLANTS

COMPANY

NEOEN is a French Independent renewable Power Producer with a long term develop-and-hold strategy.

Founded in 2008, NEOEN is active in solar photovoltaic, wind, and biomass.

NEOEN has more than 1550MW of installed and forthcoming capacity and operates in France, Australia, Mexico, El Salvador, Argentina, Zambia, Jamaica, Portugal, Mozambique and the USA.

NEOEN runs Europe's most powerful solar PV installation, in Cestas, France, and the world's largest lithium-ion battery in Hornsdale, Australia. NEOEN's main shareholders are Impala (group owned by Jacques Veyrat), the fund Capénergie II (managed by Omnes Capital) and Bpifrance.

SERVICES

NEOEN is a fully integrated renewable energy player organized around four business lines to develop, finance, construct and operate its own projects.

- Development: From the selection of appropriate sites to the management of permitting processes, NEOEN crafts the most competitive technical solutions for its projects.
- Structuring and Financing: NEOEN provides the equity and negotiates the best financing structure with first-rate financial institutions thanks to high-standard projects and a long-term commitment.
- Construction: NEOEN oversees project construction, subcontracting to a tier-one EPC contractor while ensuring enforcement of strict technical requirements and the selection of quality suppliers.
- Operation: NEOEN sells the electricity produced by its plants during their entire operation, ensuring maximal production throughout the lifetime of the plant through careful supervision and best-in-class asset management.

With its long-term develop-investment-hold approach, NEOEN is a key complementary partner for developers or EPC players to implement projects on a build, own and operate basis.
