## SOLAR TRACKER DESIGN, INSTALLATION AND MAINTENANCE FOR UTILITY-SCALE PHOTOVOLTAIC POWER PLANTS

### COMPANY

Founded in 2009, Optimum Tracker is an innovation-driven company that specializes in design, manufacturing, commercialization and maintenance of patented Solar Trackers and Fixed-tilt Structures for large PV Power Plant. Its mission is to grow the contribution of solar power in the global energy mix by making it increasingly competitive. To achieve this, Optimum Tracker has developed mechanical and software patented innovation like the 3<sup>rd</sup>

generation of tracker O-Track® Hz self-powered and connected, or like Opti-SkyControl® a smart feature to enhance energy harvesting in diffuse light condition.

In order to increase the value of its partners' assets, Optimum Tracker offer simple and robust solutions always originated from customer's needs and common sense. Its experienced team have the know-how to manage international project with care and precision during the whole installation step.

With a presence in 3 continents – The Americas, Europe and Africa – Optimum Tracker is fully integrated into its local environment to better serve its client's success.

Optimum Tracker has been recently listed among the 150 promising companies to follow by E&Y, and has received the Grand Prix Growth Companies 2016 in GreenTech & Energy category by Leaders Leagues Magazine.

### SERVICES

In order to control the cost and risk, Optimum Tracker presents a complete service offering: Design, Engineering, Manufacturing, Installation and Maintenance. Optimum Tracker has a worldwide installation capacity with manufacturer partnership to propose local content. Its product's warranty is 5 year which can be extended to 10 year. All Optimum Tracker's activities are certified ISO 9001 and ISO 14001.

# OPTIMUM TRACKER

## PRODUCTS

Optimum Tracker's patented products possess unique characteristics giving them advantages in term installation's rapidity and energy yield. The mechanical structures are optimized in terms of strength, robustness and reliability to support 25 year life of a solar project.

### O-TRACK®HZ

Horizontal Single Axis Tracker, with independent tracking rows. Increase solar plant production till 30% compared to a fixed-tilt installation.

### O-FIXED®TILT

Suitable for a 20% slope and directly integrating the grounding connection between module and structure to reduce time of installation.
