EPC – SOLAR PV POWER PLANTS

COMPANY

Created in 2008 by three partners, the TECHNIQUE SOLAIRE group now has about 50 employees. The group includes 41 subsidiaries under the JLT Invest operating holding company, of which 35 are project companies. The principle subsidiaries are:

- TECHNIQUE SOLAIRE which develops, finances, constructs, and operates photovoltaic power plants.
- TECHNIQUE SOLAIRE PRESTATIONS which executes electricity, roofing, and maintenance packages.
- TECHNIQUE SOLAIRE INVEST which produces electricity from renewable source.

We have at heart the development of a policy of transparency in the discussions we have with our clients.

To show its commitment to respecting its values, the TECHNIQUE SOLAIRE has been ISO 9001 and ISO 14001 certified since November 2016. These certifications are the quality of our development, design, implementation, and operations processes for solar photovoltaic power plants.

SERVICES

Mastering all areas of the value chain, from development to the construction and operation of its photovoltaic power plants, the TECHNIQUE SOLAIRE group is surrounded by engineers to offer “turn-key” solutions that are consistently better adapted and more competitive for its clients.

TECHNIQUE SOLAIRE proposes solutions:

- According to your profile
- According to your needs

To run the best turn-key project, we used to work in departments:

- Development
- Project Financing
- Studies and Design
- Construction
- Operation and Maintenance

TECHNIQUE SOLAIRE

PRODUCTS

TECHNIQUE SOLAIRE offers “turn-key” solutions according to your project.

- Ground-mounted power plants
- Car park shelters
- Support for renovation of large roofs
- Photovoltaic greenhouse construction
- Industrial and/or agricultural building construction support

INTERNATIONAL PRESENCE

TECHNIQUE SOLAIRE is present in India under the subsidiary JLTM Energy where it recently inaugurated its first ground-mounted power plant in the region of Uttarakhand. This power plant is 5.5 MWp and is a great example of what the TECHNIQUE SOLAIRE group is capable of providing abroad.
