DEVELOPER & INVESTOR – PHOTOVOLTAIC POWER PLANTS

COMPANY

TRYBA ENERGY was founded in 2008 by Johannes Tryba, sole shareholder of the Atrya Group, a European leader in home solutions like windows, doors, verandas, shutters... Our core business is to develop, finance and build multi-megawatt photovoltaic power plants in France and abroad. Up to date, TRYBA ENERGY has developed more than 100 MWp and commissioned about 50 MWp of photovoltaic power plants.

Besides, TRYBA ENERGY can also undertake Operation and Maintenance of those plants. We currently operate around 150 plants for an output of close to 30 MWp.

SERVICES

TRYBA ENERGY is specialized in 3 main activities:

- Development: managing the whole chain from the site identification until the fully permitted stage.
- Financing: supporting the development costs, financing the construction and bringing debt with equity for the operation.
- Operation and Maintenance: ensuring maximum output of the power plant with 24/7 monitoring, preventive and curative maintenance.

TRYBA ENERGY is working closely with qualified partners and is focused on projects quality whilst mastering the key skills in all stages of development.

INTERNATIONAL PRESENCE

TRYBA ENERGY is focused on three areas: Africa, Middle East and East Europe. Our aim is to develop new photovoltaic power plants in other countries. We will achieve this thanks to our track record. The new projects will be realised with local partners. We believe in win-win partnership and we are always interested to start new collaborations.
