RENEWABLE ENERGY DEVELOPMENT - INDEPENDENT POWER PRODUCER

COMPANY

Total Eren (formerly EREN RE), member of EREN Groupe, was founded in 2012 by Pâris Mouratoglou and David Corchia, both with significant experience in the renewable energy sector. EREN Groupe is the first group dedicated to natural resource efficiency. The Group promotes and invests in technological innovations in the water, basic materials and energy sectors. Total Eren develops projects in countries where renewable energy provides an economically viable response to growing power demand. Through partnerships established with local developers, Total Eren has accumulated a portfolio of more than 910 MW (gross) of renewable energy assets in operation and under construction, and over 1.5 GW of assets under development.

TOTAL EREN

REFERENCES

850 MW of projects in operation and under construction around the world, and 1,500 MW in development

Owner of 6.5 MWp solar power plant in the South of France, near the village of Puylobrier since 2011 (First Solar modules)

Developer and owner of 120 MWp solar plant in India, in the Rajasthan region, since 2015

Developer and owner of 25.5 MW wind power plant in Greece since 2012 (Gamesa turbines)
